

Education Material: Circular Best Practice Cards

D.1.1.2.4

Interreg
Alpine Space

Co-funded by
the European Union

CEFoodCycle

To present the CEFoodCycle research project at several events, the Salzburg University of Applied Sciences, created (German-language) cards that focus on mainly local examples of circular economy best practice companies in the food sector. The Circular Best Practice Cards are used at events, training courses etc. to break down the complex topic to a tangible level using real company examples. The cards serve as conversation starters and to showcase how Circular Economy can look like in practice.

Content

Description of (mainly) Austrian companies that implement effective Circular Economy strategies to reduce waste.

Aim

To raise awareness of food waste, resource scarcity and waste in general.

Possible applications

The Circular Best Practice Cards can be hung up on a pin board or presented standing at a table with special slots. The relevant Best Practice Card can be picked up during the explanation to draw attention to it.

Learning objectives

- Raise awareness: Participants should recognise the importance of food waste.
- Promote understanding: To teach the basics of the food supply chain and waste prevention.
- Familiarise participants with best practices: to present examples of successful companies.

This project is co-funded by the European Union through the Interreg Alpine Space programme.
